COMP1787 (2025/2026)	Requirements Management	Contribution: 100% of course
Module Leader: **Dr. Aditi Rawal**	**Coursework Term 2 (collabs)**	**Deadline Date:**

This coursework will be marked anonymously
YOU MUST NOT PUT ANY INDICATION OF YOUR NAME IN YOUR SUBMISSION ONLY YOUR ID

This coursework should take an average student who is up to date with tutorial work approximately 50 hours

Learning Outcomes:

1. Analyse and compare current approaches to requirements management within a development environment.
2. Assess the impact of stakeholders and organisational culture on the development of effective requirements and system development.
3. Relate issues associated with risk, quality, and Legal/Social/Ethical/Professional (LSEPI) to a practical scenario.

Plagiarism is presenting somebody else's work as your own. It includes copying information directly from the Web or books without referencing the material; submitting joint coursework as an individual effort; copying another student's coursework; stealing or buying coursework from someone else and submitting it as your own work. Suspected plagiarism will be investigated and if found to have occurred will be dealt with according to the procedures set down by the University.
All material copied or amended from any source (e.g. internet, books) must be referenced correctly according to the reference style you are using.
Your work will be submitted for electronic plagiarism checking. Any attempt to bypass our plagiarism detection systems will be treated as a severe Assessment Offence.

Coursework Submission Requirements

- An electronic copy of your work for this coursework should be fully uploaded by 17:00pm (local time) on the Deadline Date.
- The last version you upload will be the one that is marked.
- For this coursework you must submit a single PDF document. In general, any text in the document must not be an image (i.e. must not be scanned) and would normally be generated from other documents (e.g. MS Office using "Save As .. PDF").
- There are limits on the file size (see the relevant course Moodle page).
- Make sure that any files you upload are virus-free and not protected by a password or corrupted otherwise they will be treated as null submissions.
- You must NOT submit a paper copy of this coursework.
- All coursework must be submitted as above. Under no circumstances can they be accepted by academic staff.

The University website has details of the current Coursework Regulations, including details of penalties for late submission, procedures for Extenuating Circumstances, and penalties for Assessment Offences. See: https://www.gre.ac.uk/policies/undergraduate-and-postgraduate-taught

Detailed Specification

This coursework must be completed as an individual piece of work. This report should be up to 3000 words excluding reference list.

You must complete this assignment using the given case study. Start by reading the information given in the case study (which is included in this coursework specification). **Produce all of the deliverables detailed below.**

Note that your discussions should relate to what you have found in the case study and/or what you have learnt as a result of undertaking the given activities. External sources should be in Harvard style of referencing – we want to see your thoughts, ideas, and interpretations. When you refer to information given in the case study make sure that you refer to it appropriately to support your arguments – don't just copy text from the case study.

Case Study: Bright Care Health Ltd (BCHL)

Company Background

Bright Care Health Ltd (BCHL) is a medium-sized healthcare services company that has built a strong reputation over the past seven years. The company specialises in providing affordable, community-based health and wellness services. Its reputation is based on close partnerships with local clinics, fitness professionals, and nutritionists, ensuring that customers have access to holistic, preventive healthcare.

The mission of BCHL is to **empower communities to lead healthier lives** by combining accessible healthcare services with education and technology-driven tools for self-care and well-being.

Products and Services

BCHL offers a range of health and wellness products and services, including:

- Preventive health screenings and affordable wellness checks.
- Fitness and nutritional programmes designed in collaboration with local experts.
- Personalised care packages for families and individuals.
- Subscription-based wellness plans with flexible payment options.

To strengthen its social impact, BCHL provides **educational resources** such as guides on healthy lifestyles, preventive care, and mental well-being. It also organises **workshops and local community events** that promote physical fitness, stress management, and nutrition awareness. These initiatives are aimed at individuals who want to take a proactive approach to health but often lack easy access to structured guidance.

Bright Care Digital Expansion: The Telehealth Platform

In response to increasing demand for remote healthcare and digital services, BCHL plans to launch a **telehealth and wellness platform** within the next four months, with an **MVP in 8 weeks**. This platform will integrate online appointment booking, virtual consultations, fitness tracking, and access to educational resources.

Outsourcing Development

BCHL does not have an internal IT team and has faced challenges in past projects due to rigid, waterfall-style project management. To address this, BCHL has partnered with **Tech Forward Solutions (TFS)**, a consultancy with proven expertise in Agile software development and digital health projects.

About Tech Forward Solutions (TFS)

TFS is known for delivering scalable and secure software solutions with an Agile-first approach. They assemble multidisciplinary project teams with flexibility to work on-site or remotely, tailoring their approach to client needs. You are part of this project team.

Requirements Analysis: Initial Findings & Transcripts

Initial Findings

- BCHL lacks integration between its local clinics, fitness partners, and wellness coaches, which limits service coordination and creates inefficiencies.
- The current IT systems are mainly administrative and not equipped to support online consultations or patient self-service features.
- BCHL's culture is still transitioning toward digital adoption, and there is limited understanding of how IT can improve patient experience.
- There is a weak approach to handling sensitive medical and personal data, which poses **GDPR and healthcare compliance risks**.
- No clear Data Protection Officer (DPO) role exists within the organisation.
- Staff and partners have limited awareness of their **ethical responsibilities in handling patient data**.

Transcript of Requirements Workshop

TFS: Thank you for joining today's workshop. We'd like to hear your key pain points and what you'd like the new platform to achieve. Let's begin with internal operations.

CEO: "The biggest challenge is scheduling and appointment management. Right now, everything is manual and prone to errors. The platform must automate this and make it easier for patients and staff."

Operations Manager: "Our mission is holistic wellness. I'd like to see some integration of fitness tracking or nutrition tools in the platform. Even small things, like reminders for daily steps or hydration, would keep us aligned with our preventive healthcare ethos."

Patient Services Lead: "Patients need the ability to create and manage their accounts, book appointments, and access their consultation history securely. Some of them also request online prescription refills."

Marketing Director: "From a customer engagement perspective, we want a space for health campaigns and promotions—maybe seasonal wellness drives or discounts on health check packages."

Patient Care Representative: "Patients have been asking for flexible teleconsultation slots, especially evenings and weekends. Also, they should be able to update their records and medical information online."

CEO: "We should also consider community engagement—maybe an online forum or virtual event for health awareness campaigns. We want the platform to reflect our friendly, community-first approach."

Finance Director: "Compliance is critical. We must ensure GDPR and NHS Data Security standards are met. Any failure could be devastating both legally and reputationally."

IS Lead: "The platform should be scalable enough to handle a 50% increase in traffic during health awareness months. It should load quickly, within 3 seconds ideally, to avoid frustrating users."

Wellness Programme Coordinator: "A blog or content hub for health education is essential. Articles, short videos, and expert Q&As would really boost our credibility."

Finance Director: "On another note, we need better integration with our finance system. Currently, billing and payments are inconsistent. Patients often complain about errors, and our staff waste hours resolving them."

Deliverables:

There are three sections to this coursework. Make sure that you complete all three sections. This report should be up to 3000 words excluding reference list**.**

Section A – Produce an Executive Summary (20% of the marks)

Produce a management summary explaining whether Agile based methods would be an appropriate method to use.

Outline any advantages/drawbacks that you perceive. Give examples from the Case Study to support your answer.

Executive summaries should consider the following components:

- It is a summary of the whole report with the main findings. Think of an executive summary as a more condensed version of your whole report.
- Highlight the key advantages of the Agile approach as compared to any other with well researched citations.
- To be written in third person
- Capture the reader's attention.
- Make sure your executive summary can stand on its own.
- Write it last once you have finished the sections B and C.

Your answer should be in the region of 500-750 words.

Section B – High level requirements analysis and MoSCoW prioritisation (30% of the marks)

B1: Review the 'high level requirements' list given in the case study and identify any of the requirements that you feel are not appropriate to be high-level requirements, giving your reasons for this.

B2: Rewrite, and add to, the list to end up with a total of 8-10 'updated' high level **functional** requirements that you feel are required for building the system. Briefly justify the need for each of your high-level requirements against information you have gathered from the case study.

B3: Use the MoSCoW/Timebox rules to prioritise the requirements in your updated 'high level requirements list'.

Your answer to section B should be in the region of 750-1000 words

Section C – Legal, Social, Ethical and Professional issues (30% of the marks)

C1: Produce a management summary explaining (a) the role of the Data Controller within the organisation and (b) discuss any legal, social, ethical, and professional issues they may be faced with. As a part of your answer to (b) provide one practical example from the case study that relates to each aspect of LSEPI. Your answer to C1 should be in the region of 500-750 words.

C2: Produce a management summary outlining the purpose of the BCS Code of Conduct. As a part of this, provide a practical example for each of the four BCS Code of Conduct sections to illustrate a professional issue that a System developer contracted may need to consider. Your answer to C2 question should be in the region of 500-750 words.

Conclusion and assumptions made (10% of the marks) – Make sure to provide a strong conclusion.

References (To be done in Harvard style) **and English Proficiency - (10% of the marks)**

Assessment Criteria (Breakdown):

Section A - Executive Summary- 20%

Section B - High level requirements analysis and MoSCoW prioritisation 30%

Section C - Legal, Social, Ethical and Professional issues 30%

Conclusion and assumptions - 10%

Harvard Style of referencing and English Proficiency - 10%

COMP 1787 Requirements Management - Marking Rubric

	0-29% Fail	***30-39% Fail***	***40-49% Satisfactory***	***50-59% Good***	***60-69% Very Good***	***70-79% Excellent***	***80-100% Outstanding***
D1 Knowledge **Understanding concepts and application of requirements management within a development environment**	Demonstrate Little or no understanding of the issues surrounding the application of Agile based methods to a development environment. • Little or no understanding of the requirements of the assignment and MoSCoW prioritisation.	Demonstrate an unsatisfactory understanding of the issues surrounding the application of Agile based methods to a development environment. •Poor understanding of the requirements of the assignment and MoSCoW prioritisation	Demonstrate a basic understanding of the issues surrounding the application of Agile based methods to a development environment. •Demonstrate a basic understanding of high-level requirements analysis and MoSCoW prioritisation.	Demonstrate a satisfactory understanding of some of the issues surrounding current development methodology approaches. •Demonstrate understanding of some the issues relating to high level requirements analysis and MoSCoW prioritisation.	Demonstrate a good understanding of the issues surrounding the application of Agile based methods to a development environment. •Demonstrate a good understanding of high-level requirements analysis and MoSCoW prioritisation.	Demonstrate an excellent understanding of the issues surrounding the application of Agile based methods to a development environment. •Demonstrate a thorough understanding of high-level requirements analysis and MoSCoW prioritisation.	Demonstrate an outstanding understanding of the issues surrounding the application of Agile based methods to a development environment. •Demonstrate exceptional understanding of high-level requirements analysis and MoSCoW prioritisation.
D2 Evaluation **Contextualised evaluation of the case study with relevant discussion.**	Little to no understanding of the requirements of the assignment.	Narrowly fails to provide sufficient evidence of effective understanding	Barely sufficient evidence of effective report writing for the assignment.	A sound approach to writing your report and conveying your argument.	A robust approach to writing your report and conveying your argument.	An excellent approach to writing your report and conveying your argument.	•A deeply impressive demonstration of research, organisation, initiative,

Clear understanding of risk, quality, LSEPI contextualised to the case study	Poor understanding of risk and the LSEP issues •Demonstrate an inadequate understanding of the DPA principles and the role of the professional and the BCS code of conduct.	report writing for this assignment. An unsatisfactory understanding of risk and the LSEP issues. Proposed inadequate solutions to solving problems.	A satisfactory understanding of risk and the LSEP issues. Proposed some adequate solutions to solving problems. Demonstrate a basic understanding of the DPA principles and the practical role BCS code of conduct.	A reasonable understanding of risk and the LSEP issues. Proposed for most part relevant solutions to solving problems. •Demonstrate an understanding of the role of the professional and the BCS code of conduct. •Identify some practical examples relating to the above	A clear understanding of risk and the LSEP issues. Proposed sensible solutions to solving problems. •Demonstrate a good understanding of the role of the professional and the BCS code of conduct. •Bring some original thought to the argument;	A detailed understanding of risk and the LSEP issues. Proposed creative solutions to solving problems. •Demonstrate a thorough understanding of the role of the professional and the BCS code of conduct. •Bring original thought to the argument.	analysis, and application, worthy of publication with the required referencing. •Demonstrate an outstanding understanding of the role of the professional and, in particular, the BCS code of conduct.
D3 Research Use of research informed evidence And depth of the investigation	Unable to fully demonstrate of initiative, research, critical analysis, organisation, engagement, and application.	Narrowly fails to demonstrate of initiative, research, critical analysis, organisation, engagement, and application.	A satisfactory demonstration of initiative, research, critical analysis, organisation, engagement, and application.	A good demonstration of initiative, research, critical analysis, organisation, engagement, and application.	A very good demonstration of initiative, research, critical analysis, organisation, engagement, and application.	An impressive demonstration of initiative, research, critical analysis, organisation, engagement, and application.	An exceptional demonstration of initiative, research, critical analysis, organisation, engagement, and application
D4 Communication Ability to evaluate and	An unsatisfactory attempt at evaluating and	The ability to evaluate and discuss the main options in	Basic report writing skills that enable you to set out a	The ability to critically evaluate and discuss the relevant options in	The ability to critically evaluate and discuss the	The ability to critically evaluate and discuss the	The ability to critically evaluate and discuss the

discuss the main options with required standard of English proficiency.	discussing the main options in a coherent way. Ideas do not flow well and there is minimal or no argument to support	an unsatisfactory way.	structured, but argument. Limited effort to grasp possible alternative options.	a competent discussion.
